

Biotechnology Solution Prototype Build Request

Contact Name/Team

Contact Email

Project Title

1. Solution Description

Provide a short summary of the solution prototype request

2. Business Need

Describe the business need/problem the prototype will address

3. Prototype Objectives

List key objectives for this prototype

4. Key Features & Scope

What are the main features or functionalities to be included?

5. User(s) & Stakeholders

Identify main users or stakeholders

6. Data & Inputs

Describe any data, samples, or input formats (if known)

7. Timeline

Preferred timeline for prototype delivery

8. Success Criteria

How will success be measured for this prototype?

9. Additional Notes

Any other important information or constraints
