

Residential Energy Efficiency Audit Checklist

1. Building Envelope

☐ Walls insulation checked ☐ Roof/Attic insulation checked ☐ Windows/doors for drafts & leaks ☐
Weatherstripping and caulking ☐ Attic/roof ventilation

2. Heating and Cooling Systems

☐ HVAC system inspected ☐ Thermostat operation checked ☐ Ductwork sealed and insulated ☐ Air
filters replaced/cleaned ☐ Age and efficiency evaluated

3. Lighting

☐ LED/CFL bulbs installed ☐ Use of daylight where possible ☐ Lighting controls/timers/sensors

4. Appliances & Electronics

☐ Energy Star appliances in use ☐ Unused devices unplugged ☐ Refrigerator seals checked ☐ Laundry
and kitchen efficiency

5. Water Heating

☐ Water heater insulation ☐ Hot water pipe insulation ☐ Water temperature set efficiently ☐ Low-flow
fixtures installed

6. Renewable Energy Sources

☐ Solar panels assessed/installed ☐ Solar water heating checked ☐ Other renewable systems present

Notes & Recommendations
