

# Split AC Unit Efficiency Assessment Sheet

## General Information

Location

Date

Inspected By

AC Make & Model

Serial Number

Capacity (BTU/hr)

## Operating Conditions

Parameter	Reading	Unit	Remarks
Room Temperature	<input type="text"/>	Â°C	<input type="text"/>
Set Temperature	<input type="text"/>	Â°C	<input type="text"/>
Outdoor Temperature	<input type="text"/>	Â°C	<input type="text"/>
Indoor Coil Temp	<input type="text"/>	Â°C	<input type="text"/>
Supply Air Temp	<input type="text"/>	Â°C	<input type="text"/>
Return Air Temp	<input type="text"/>	Â°C	<input type="text"/>

## Electrical Data

Component	Voltage	Current	Power (W)	Remarks
Compressor	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Fan Motor	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
Indoor Unit	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

## Visual Checks

Air Filter Condition

Refrigerant Piping

Condensate Drain

Outdoor Unit Condition

Noise Level

Other Observations

Efficiency Assessment

Calculated EER/COP

Assessment Summary

Recommendations
