

Data Center Power Outage Checklist

Pre-Outage Preparation

- ☐ Notify relevant stakeholders and staff
- ☐ Confirm emergency power systems (UPS, generators) are operational
- ☐ Backup all critical data
- ☐ Identify and label critical systems and their power sources
- ☐ Communicate outage procedures and responsibilities

During Outage

- ☐ Confirm activation of UPS and generator systems
- ☐ Monitor temperature and environment sensors
- ☐ Record the exact time of power loss
- ☐ Communicate status updates to all stakeholders
- ☐ Assess impact on critical systems

Post-Outage Recovery

- ☐ Verify restoration of main power
- ☐ Gradually restore systems and services
- ☐ Inspect equipment for damage or faults
- ☐ Review and confirm data integrity
- ☐ Communicate recovery status to stakeholders

Notes
