

Secondary Data Analysis Informed Consent Waiver Request

Project Title

Principal Investigator Name

Study Description

Briefly describe the purpose and objectives of your study.

Description of Data Source

Describe the data set(s) to be analyzed, including source, content, and identifiers if any.

Justification for Waiver of Informed Consent

Explain why it is not practical to obtain informed consent from data subjects. Address all required criteria for waiver (minimal risk, rights/welfare, practicability, additional information if appropriate).

Risks to Subjects and Minimization Procedures

Describe risks to subjects and how these risks are minimized.

Privacy & Confidentiality Protections

Describe procedures for safeguarding data confidentiality and privacy (e.g. storage, access, de-identification).

Will the data include any direct identifiers?

Is the data publicly available?

Additional Information

Provide any additional information relevant to the waiver request.
