## Environmental Knowledge Assessment

1. List the main environmental challenges currently faced by your locality.

2. Describe any existing policies or programs your local government implements to address environmental issues.

3. How does your department promote sustainability and environmental awareness?

4. In your opinion, what areas of environmental management need the most improvement?

5. Have you received any formal environmental training? If yes, please specify.

6. What resources or support would help enhance your capacity in environmental management?

7. Rate your level of knowledge on local environmental laws and regulations.

8. Additional comments or suggestions:
