

# Home Energy Efficiency Audit Checklist

## 1. Building Envelope

- ☐ Check for air leaks around doors and windows
- ☐ Inspect weatherstripping and thresholds
- ☐ Examine insulation in attic and walls
- ☐ Review exterior caulking and seals

## 2. Heating & Cooling Systems

- ☐ Inspect HVAC filters and replace if needed
- ☐ Check ductwork for leaks or disconnections
- ☐ Evaluate programmable thermostat usage
- ☐ Assess age and condition of furnace/AC units

## 3. Water Heating

- ☐ Check water heater temperature setting
- ☐ Inspect for water leaks or corrosion
- ☐ Evaluate water heater insulation
- ☐ Check efficiency of showerheads and faucets

## 4. Lighting

- ☐ Replace incandescent bulbs with energy-efficient bulbs
- ☐ Assess use of natural lighting
- ☐ Check for unnecessary light usage

## 5. Appliances & Electronics

- ☐ Check age and efficiency ratings of major appliances
- ☐ Look for excessive standby power (‘‘phantom load’’)
- ☐ Unplug unused electronics

## 6. Additional Notes
